

## un stage changes

How to unstage changes from the staged area. write commands for it.

To unstage changes from stage area we can use git reset with the file name to bring it back to local directory.

git reset <filename>

```
Prem github-basic → (master 1) ♥ 16:41 echo hello again >> file1.txt
Prem github-basic → (master 1) ♥ 16:41 git add .
Prem github-basic → (master 1) ♥ 16:41 git reset .\file1.txt
Unstaged changes after reset:
M   file1.txt
Prem github-basic → (master 1) ♥ 16:42 git status
On branch master
Changes not staged for commit:
  (use "git add <file>..." to update what will be committed)
  (use "git restore <file>..." to discard changes in working directory)
    modified:   file1.txt

no changes added to commit (use "git add" and/or "git commit -a")
Prem github-basic → (master 1) ♥ 16:42 |
```

We can also restore with the --staged option to unstage it.

```
modified:   file1.txt
Prem github-basic → (master 1) ♥ 16:44 git restore --staged .\file1.txt
Prem github-basic → (master 1) ♥ 16:44 git status
On branch master
Changes not staged for commit:
  (use "git add <file>..." to update what will be committed)
  (use "git restore <file>..." to discard changes in working directory)
    modified:   file1.txt
```
